# Safety Data Sheet

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product form : Mixture
Product name : Gulf Sport Fuel

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the substance/mixture : Fuel

#### 1.3. Details of the supplier of the safety data sheet

#1 FUEL IRISH TED-MENA LIMITED

Unit 12C Beulah Building

Finisklin Road

Sligo F91R2V5, Ireland

### 1.4. Emergency telephone number

No additional information available

### **SECTION 2: Hazards identification**

#### 2.1. Classification of the substance or mixture

#### **Classification (GHS-US)**

Flam. Liq. 1	H224
STOT SE 3	H336
STOT SE 1	H370
Asp Tox 1	H304
Skin Irrit 2	H315
Repr 2	H361
STOT SE 2	H371
STOT RE 1	H372
Aqua Chronic 2	H411

#### 2.2. Label elements

## **GHS-US** labelling

Hazard pictograms (GHS-US):

Signal word (GHS-US)

Hazard statements (GHS-US)

: H224 - Extremely flammable liquid and vapor

H225 - Highly flammable liquid and vapor

H304 - May be fatal if swallowed and enters airways

H315 - Causes skin irritation

: Danger

H336 - May cause drowsiness or dizziness

H361 - Suspected of damaging fertility or the unborn child

H370 – Causes Damage to organs H371 – May cause damage to organs

H372 - Causes damage to organs thru prolonged or repeated exposure

H411 – Toxic to aquatic life with long lasting effects

Precautionary statements (GHS-US)

: P210 - Keep away from heat/sparks/open flames/hot surfaces. - No smoking

P233 - Keep container tightly closed

P240 - Ground/bond container and receiving equipment

P241 - Use explosion-proof electrical/ventilating/lighting/equipment

P242 - Use only non-sparking tools

P243 - Take precautionary measures against static discharge P260 - Do not breathe

dust/fume/gas/mist/vapors/spray

P261 - Avoid breathing dust/fume/gas/mist/vapors/spray

P264 - Wash thoroughly after handling

P271 - Use only outdoors or in a well-ventilated area P270 – Do not eat, Drink or Smoke when using this product

P273 - Avoid release to the environment

P280 – Wear protective gloves/protective clothing/eye protection / face protection

P301+P310 - IF SWALLOWED: immediately call a POISON CENTER or doctor/physician

P302+P352 - IF ON SKIN: Wash with plenty of soap and water

P303+P361+P353 - IF ON SKIN (or hair): Remove/Take off immediately all contaminated

clothing. Rinse skin with water/shower

8/30/2021 EN (English US) Page 1

# Safety Data Sheet

P304+P340 - IF INHALED: remove victim to fresh air and keep at rest in a position comfortable for breathing

P312 - Call a POISON CENTER/doctor/physician if you feel unwell

P314 - Get medical advice and attention if you feel unwell

P331 - If swallowed, do NOT induce vomiting

P332+P313 - If skin irritation occurs: Get medical advice/attention

P362 - Take off contaminated clothing and wash before reuse

P370+P378 - In case of fire: Use COŽ, dry chemical, foam (AFFF/ATC) or water spray for extinction

P391 - Collect spillage

P403+P233 - Store in a well-ventilated place. Keep container tightly closed

P403+P235 - Store in a well-ventilated place. Keep cool

P405 - Store locked up

P501 - Dispose of contents/container in accordance with local/regional/national/international regulations.

### 2.3. Other hazards

Flammable vapors can accumulate in head space of closed systems.

## 2.4. Unknown acute toxicity (GHS-US)

No data available

# **SECTION 3: Composition/information on ingredients**

#### 3.1. Substance

Not applicable

### 3.2. Mixture

Name	Product identifier	%	Classification (GHS-US)

8/30/2021 EN (English US) 2/9

# Safety Data Sheet

### **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

First-aid measures after inhalation

: Remove person to fresh air. If not breathing, administer CPR or artificial respiration. Get immediate medical attention.

First-aid measures after skin contact

: After contact with skin, wash immediately with plenty of water and soap. If skin reddening or irritation develops, seek medical attention. If on clothes, remove clothes.

First-aid measures after eye contact

: Immediately flush the eyes with plenty of water for at least 15 minutes while holding eyelids apart to ensure flushing of the entire surface of the eye. Remove contact lenses. Continue flushing for an additional 15 minutes if a physician is not immediately available. Seek medical attention, preferably an ophthalmologist, immediately.

First-aid measures after ingestion

: If the material is swallowed, get immediate medical attention or advice. DO NOT induce vomiting unless directed to do so by medical personnel. Do not give milk or alcoholic beverages. Never give anything to an unconscious person.

#### 4.2. Most important symptoms and effects, both acute and delayed

Symptoms/injuries after inhalation

Breathing high concentrations may be harmful. May cause central nervous system depression or effects. Symptoms may include headache, excitation, euphoria, dizziness, incoordination, drowsiness, light-headedness, blurred vision, fatigue, tremors, convulsions, loss of consciousness, coma, respiratory arrest and death, depending on the concentration and duration of exposure. Breathing high concentrations of this material, for example, in a confined space or by intentional abuse, can cause irregular heartbeats which can cause death.

Symptoms/injuries after skin contact

: Contact may cause reddening, itching and inflammation.

Symptoms/injuries after eye contact

Contact may cause pain and severe reddening and inflammation of the conjunctiva. Effects may become more serious with repeated or prolonged contact.

Symptoms/injuries after ingestion

: May cause irritation of the mouth, throat and gastrointestinal tract. May cause central nervous system depression or effects. Symptoms may include salivation, pain, nausea, vomiting and diarrhea. Exposure may also cause central nervous system symptoms similar to those listed under "Inhalation"

#### 4.3. Indication of any immediate medical attention and special treatment needed

No additional information available

#### **SECTION 5: Firefighting measures**

#### 5.1. Extinguishing media

Suitable extinguishing media

: CO2, dry chemical, foam (AFFF/ATC), fog or water spray, Alcohol-resistant foam.

Water can be used to keep surrounding materials cool.

Unsuitable extinguishing media : None.

#### 5.2. Special hazards arising from the substance or mixture

Fire hazard

: Extremely flammable liquid and vapor.

Explosion hazard

: In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion, hazardous vapors may travel

long distances along ground before igniting/flashing back to vapor source.

#### 5.3. Advice for firefighters

Protection during firefighting

: Firefighters should not enter fire area without proper protective equipment, including respiratory protection – wear full protective gear.

### **SECTION 6: Accidental release measures**

# 6.1. Personal precautions, protective equipment and emergency procedures

#### 6.1.1. For non-emergency personnel

Use appropriate personal protection equipment (PPE). Evacuate unnecessary personnel. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas.

### 6.1.2. For emergency responders

Equip clean-up crew with proper protection. Use appropriate personal protection equipment (PPE). **Emergency Procedures**: Upon arrival at the scene, a first responder is expected to recognize the presence of dangerous goods, protect oneself and the public, secure the area and call for the assistance of trained personnel as soon as conditions permit. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.

#### 6.2. Environmental precautions

Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters.

## 6.3. Methods and material for containment and cleaning up

8/30/2021 EN (English US) 3/9

# Safety Data Sheet

For containment

Methods for cleaning up

- : If possible, stop flow of product.
- Small spill: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.

Large spill: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillage into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

#### 6.4. Reference to other sections

No additional information available

### **SECTION 7: Handling and storage**

#### 7.1. Precautions for safe handling

Precautions for safe handling

: Comply with all applicable EPA, OSHA, NFPA and consistent state and local requirements. Use appropriate grounding and bonding practices. Store in properly closed containers that are appropriately labeled and in a cool well-ventilated area. Avoid formation of aerosol. Do not breathe vapors/dust. Do not expose to heat, open flames, strong oxidizers or other sources of ignition. Do not cut, drill, grind or weld on empty containers since they may contain explosive residues. Avoid skin contact. Exercise good personal hygiene including removal of soiled clothing and prompt washing with soap and water.

### 7.2. Conditions for safe storage, including any incompatibilities

Storage conditions

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, awayfrom incompatible materials (see section 10) and food and drink. No Smoking. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready foruse. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

### 7.3. Specific end use(s)

Fuel

### SECTION 8: Exposure controls/personal protection

#### 8.1. Control parameters

2-methoxy-2-methyl propane (1634-04-4)		
Value	Control Parameters	Basis
TWA	50 ppm	USA, UCGIH Threshold Limt Values (TLV)
	Rema	rks: Upper Respiratory Track irritation
		Kidney damage
		Confirmed animal carcinogen with unknown relevance to humans
PEL	40 ppm 144 mg/m3	California permissible exposure limits for chemical contaminants (Title 8, Article 107)

## 8.2. Exposure controls

Appropriate engineering controls

Local exhaust and general ventilation must be adequate to meet exposure standards.
 Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure.

Hand protection

: Wear impervious gloves to minimize skin contact. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion and contact time.

Eye protection

: Safety glasses. Wear splash goggles if splashing is likely.

Skin and body protection Respiratory protection  $: \ \ We ar \ suitable \ working \ clothes. \ Workers \ should \ we ar \ antistatic \ footwear.$ 

: If airborne concentrations are above the applicable exposure limits, use NIOSH approved respiratory protection. Air-Purifying Respirator for Organic Vapors.

## **SECTION 9: Physical and chemical properties**

9.1. Information on basic p	hysical and chemical properties
-----------------------------	---------------------------------

Physical state : Liquid

Odor : Gasoline/ hydrocarbon like odor

8/30/2021 EN (English US) 4/9

# Safety Data Sheet

Odor threshold	:	No data available
рН	:	Neutral
Relative evaporation rate (butylacetate=1)	:	No data available
Boiling point	:	No data available
Flash point	:	No data available
Self ignition temperature	:	No data available
Decomposition temperature	:	No data available
Flammability (solid, gas)	:	No data available
Vapor pressure	:	No data available

Relative vapor density at 20 °C : 3 Specific gravity : .707 Solubility : Negligible. Log Pow : No data available Log Kow : No data available : No data available Viscosity, kinematic Viscosity, dynamic : No data available Explosive properties : No data available Oxidizing properties : No data available : No data available Explosive limits

9.2. Other information

VOC content : 100 %

## **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

No additional information available

## 10.2. Chemical stability

The product is stable at normal handling and storage conditions.

## 10.3. Possibility of hazardous reactions

Vapors may form explosive mixture with air.

### 10.4. Conditions to avoid

Heat, flames, and other ignition sources.

# 10.5. Incompatible materials

Strong oxidizing agents.

8/30/2021

## 10.6. Hazardous decomposition products

Combustion produces carbon monoxide, aldehydes, aromatic and other hydrocarbons.

## **SECTION 11: Toxicological information**

### 11.1. Information on toxicological effects

Acute toxicity : Harmful in contact with skin. Harmful if inhaled.

Naphtha (petroleum), full-range alkylate (68527-27-5)

Cyprinus carpio (Carp) – 28 days at 25°C (Tert-butyl methyl ether) - Bioconcentration factor (BCF): 1.5	

#### 12.4. Mobility in soil

No additional information available

#### 12.5. Other adverse effects

Avoid release to the environment

## **SECTION 13: Disposal Considerations**

#### 13.1. Waste treatment methods

Waste disposal recommendations : Dispose of contents/container in accordance with local/regional/national/international regulations.

Product : The products should not be allowed to enter drains, water courses or the soil. Do not contaminate

ponds, waterways or ditches with chemical or used container. Send to a licensed waste

management company.

Contaminated Packaging : Empty Remaining contents. Dispose of as unused product. Do not re-use empty containers. Do

not burn, or use a cutting torch on the empty drum.

### **SECTION 14: Transport information**

In accordance with DOT

Transport document description : UN1203 Gasoline includes gasoline mixed with ethyl alcohol, with not more than 10% alcohol, 3,

l

UN-No.(DOT) : 1203
DOT NA no. : UN1203
DOT Proper Shipping Name : Gasoline

includes gasoline mixed with ethyl alcohol, with not more than 10% alcohol

: 3 - Class 3 - Flammable and combustible liquid 49 CFR 173.120

Department of Transportation (DOT) Hazard

Classes

Hazard labels (DOT) : 3 - Flammable liquid

Packing group (DOT) : II - Medium Danger

8/30/2021 EN (English US) 7/9

# Safety Data Sheet

DOT Special Provisions (49 CFR 172.102)

144 - If transported as a residue in an underground storage tank (UST), as defined in 40 CFR 280.12, that has been cleaned and purged or rendered inert according to the American Petroleum Institute (API) Standard 1604 (IBR, see 171.7 of this subchapter), then the tank and this material are not subject to any other requirements of this subchapter. However, sediments remaining in the tank that meet the definition for a hazardous material are subject to the applicable regulations of this subchapter.

177 - Gasoline, or, ethanol and gasoline mixtures, for use in internal combustion engines (e.g., in automobiles, stationary engines and other engines) must be assigned to Packing Group II regardless of variations in volatility.

B1 - If the material has a flash point at or above 38 C (100 F) and below 93 C (200 F), then the bulk packaging requirements of 173.241 of this subchapter are applicable. If the material has a flash point of less than 38 C (100 F), then the bulk packaging requirements of 173.242 of this subchapter are applicable.

B33 - MC 300, MC 301, MC 302, MC 303, MC 305, MC 306, and DOT 406 cargo tanks equipped with a 1 psig normal vent used to transport gasoline must conform to Table I of this Special Provision. Based on the volatility class determined by using ASTM D 439 and the Reid vapor pressure (RVP) of the particular gasoline, the maximum lading pressure and maximum ambient temperature permitted during the loading of gasoline may not exceed that listed in Table I. IB2 - Authorized IBCs: Metal (31A, 31B and 31N); Rigid plastics (31H1 and 31H2); Composite (31HZ1). Additional Requirement: Only liquids with a vapor pressure less than or equal to 110 kPa at 50 C (1.1 bar at 122 F), or 130 kPa at 55 C (1.3 bar at 131 F) are authorized.

T4 - 2.65 178.274(d)(2) Normal......178.275(d)(3)

DOT Packaging Exceptions (49 CFR 173.xxx) : 150
DOT Packaging Non Bulk (49 CFR 173.xxx) : 202
DOT Packaging Bulk (49 CFR 173.xxx) : 242
DOT Quantity Limitations Passenger aircraft/rail : 5 L
(49 CFR 173.27)

DOT Quantity Limitations Cargo aircraft only (49 : 60 L

CFR 175.75)

**DOT Vessel Stowage Location** 

: E - The material may be stowed "on deck" or "under deck" on a cargo vessel and on a passenger vessel carrying a number of passengers limited to not more than the larger of 25 passengers, or one passenger per each 3 m of overall vessel length, but is prohibited from carriage on passenger vessels in which the limiting number of passengers is exceeded.

### **SECTION 15: Regulatory Information**

### 15.1. US Federal regulations
